

IOWAccess Council
Design Phase Funding Request
November 07, 2007

Amount Requested: \$15,000.00

Project Name: DNR TIP Reporting System – 10249
Project Sponsor: Steve Dermand - IDNR
Project Manager: Darrell Fremont – DAS-ITE

Project Summary:

The purpose of this project is to develop an automated web-enabled system providing a confidential, online written format for citizens to report poaching incidents and other fish or wildlife crimes to the DNR Law Enforcement Bureau. This reporting option has been identified as a specific need, especially for those citizens who suffer from hearing loss or other impairments which make it impossible for them to report poaching incidents by telephone. The system will improve the citizen's ability to report incidents in a timelier manner, and improve response time in terms of investigations into the incident. The reported TIP will be automatically routed to DNR Law Enforcement officers to begin investigations. TIP data and investigation results will be recorded to a database to enable DNR Law Enforcement to run performance reports and research incident details assisting DNR Law Enforcement to provide statistical information to the public. Results of a successful investigation will provide for more timely and accurate information for the Iowa TIP Board to approve and distribute rewards to the reporting public.

Design Phase Activities and Deliverables:

- Project technical setup
- Create Mock Up design template
- Create Mock Ups – 15-20 views
- Database design
- Report Definitions – 10
- Requirements document
- Test plan development
- Customer meetings and approvals
